DESIGN SYSTEM · POWERED BY BRANDITA

mizan

Brandita's ink, its paper and one red point. One system for every Mizan screen, in Arabic and English, light and dark.

Geist · Alexandria · IBM Plex Sans Arabic

124 icons

CSS · Tailwind · TypeScript · Flutter

WCAG AA contrast, tested

ميزان

01

A type-only mark with one red point

The wordmark is set in Geist Bold, the Arabic in Alexandria Bold, both converted to outlines. The dot of the *i* and the dot of the ن turn Brandita red: the same rule as Brandita's own mark, black with a red dot.

Primary wordmark `mizan-wordmark.svg`

On ink `…-on-dark.svg`

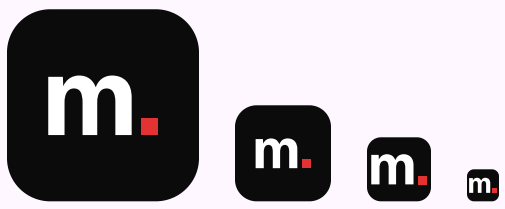

Arabic wordmark `mizan-wordmark-ar.svg`

Endorsed lockup `mizan-endorsed.svg`

Bilingual lockup `mizan-bilingual*.svg`

App icon and favicon `mizan-appicon.svg`

- ✓ **Clear space** of at least the height of the *m* on every side.
- ✓ **Minimum size:** 72 px wide on screen, 18 mm in print. Below that, use the *m.* monogram.
- ✓ **Colour:** ink with a red point on paper, white with a red point on ink, or one-colour when the medium demands it.
- × Never set the logo in live type, recolour it, outline it, rotate it or add a shadow.
- × Never move the red point or add a second red element to the mark.
- × Never place it on a busy image without a solid ink or paper ground.

07

Files for Claude Code

Everything lives in `packages/design-system`. Edit `tokens/tokens.json` only; every platform file is generated from it.

`dist/tokens.css` CSS variables, light, dark and system themes, type classes	**`dist/tailwind.css`** Tailwind v4 @theme mapping	**`dist/tailwind-preset.cjs`** Tailwind v3 preset, same names	**`dist/tokens.ts`** Typed tokens for React and charts	**`dist/mizan_tokens.dart`** Flutter colours, text styles, ThemeData
`css/components.css` Reference components (mz-*)	**`icons/react.tsx`** <Icon name="cod" /> on lucide-react	**`icons/svg · sprite.svg`** Every icon as SVG and as a sprite	**`logo/svg · png · favicon.ico`** Wordmarks, lockups, app icons	**`fonts/web · ttf`** WOFF2 for web, TTF for Flutter, OFL licences

02

Brandita's palette, with red kept for meaning

Primary actions are ink. Red marks the brand point, the active indicator, the one number that matters, and errors. If a screen shows red in four places, three of them are wrong.

04

124 icons named after the product

Built on Lucide, 1.75 stroke on a 24 grid. Names describe meaning (cod, refund, verification), not shape, so a glyph can change without touching the app. Icons marked ⇄ mirror in Arabic.

05

Flat, precise components

No shadows on cards or buttons, as in Brandita's identity; only floating layers (menus, dialogs) cast one. Every rule uses logical properties, so Arabic layouts mirror with no extra code.
